## Profile

I am a junior programmer at the beginning of my new career. Solving complicated problems is my passion and I tend to approach them thinking outside the box. My team will always have a fresh view on things and new ideas available when needed. I like to try and solve problems first by myself but I'm also not afraid to ask for advice when necessary.

I changed my career from chef to IT because I could not satisfy my will to learn new things and evolve. A career in IT finally gave me an unlimited amount of possibilities which is what I thrive on. My greatest talent is aiming 100% focus on my tasks and doing them precisely.

## Education

SEPTEMBER-DECEMBER 2019

**C#.NET, AW Academy**

AW Academy is an intensive training program for industries experiencing skills shortage. All students must earn their spot in the program by passing an intensive recruitment process measuring mental ability, personality and motivation. Our program focused on C#.NET.

2019

**Scrum Master**

## Projects

2020

**Academic Work Oy**

Database for rabbit breeders (C#.NET, Azure, SQL, Javascript)

Bad aphorism generator (Arduino)

Console app for tabletop RPGs Game Master (C++)

2019

**AW Academy's C#.NET-program**

Final project: 2D TopDown RPG-game (Unity, C#)

HauMau—a meeting place for pets and pet owners (C#.NET, SQL, Git)

WinForms / Console game “Tamagotchi” (C#, Git)

More information of my projects is on my [GitHub](#) and [portfolio page](#)
